## What IS MODSIM WORLD?

MODSIM World is a multi-disciplinary international Modeling and Simulation (M&S) event that provides a unique opportunity to learn about new M&S applications and practices across diverse domains.

MODSIM World began in 2007 by the Virginia Modeling and Simulation Partnership (formerly the Center for Public and Private Partnership), a non-profit organization that draws membership from the M&S industry and community leaders in Virginia Beach and the entire Hampton Roads area.

Specific areas of focus vary from year to year, based upon current events and interest levels. Focus areas for 2017 include Energy, Cyber, Healthcare, Shipping, Manufacturing, Transportation, Defense, Entrepreneurship, Learning Science, and Homeland Security. These focus areas or “themes” cut across the universal and enduring conference tracks of Training and Education, Analytics and Decision-Making, Science and Engineering, and Visualization and Gamification.

## Why YOU SHOULD SUPPORT MODSIM WORLD 2017...

- ▶ Only industry centric conference with broad coverage of the modeling and simulation industry
- ▶ Technology showcase where leaders in the industry will be demonstrating the latest in M&S technologies
- ▶ A unique opportunity to capture lessons learned and new technologies across diverse domains, including Defense, Healthcare, Manufacturing, Homeland Security, Education and many more
- ▶ Networking opportunities with leading M&S professionals from industry, government and academia
- ▶ Hosted in Virginia Beach, VA, one of the largest regions in the world dedicated to modeling & simulation

## **MODSIM** WORLD VISION

MODSIM World will become the premier international conference and exposition for collaboration and transfer of M&S knowledge, new research, development and applied technology across all public and private sectors.

## **MODSIM** WORLD MISSION

- To promote the initiation, development and research of M&S among all organizations internationally.
- To share the latest technical expertise, knowledge, applications and capabilities of simulation technology by academia, industry and government.
- To promote cooperation among academia, industry and government, applying M&S technologies to help organizations anticipate and prepare for the future.
- To improve M&S technology to reduce its implementation costs by academia, industry and government.
- To support planning, decision-making and real-time operations management with state-of-the-art computer software and development expertise utilizing modeling and simulation.
- To foster the transfer of leading-edge simulation technology and knowledge from the military community to the medical, transportation, homeland security and other applicable communities.

## **Why** VIRGINIA BEACH

How big is the modeling and simulation industry in the United States and, more important, how big is it inside the Virginia Beach and entire Hampton Roads area?

While military commands have been the primary M&S customers, private sector firms have been the chief developers and providers of M&S technology. The Virginia Economic Development Partnership (VEDP) estimates that the Commonwealth's M&S industry employs 11,300 people in the private sector and about 2,800 in the government and military, with 4,800 of those employees located in the Hampton Roads area. Over half the M&S companies in Virginia are located in the Hampton Roads area, with an economic impact of \$1.7 billion on an annual basis.

In June 2007, the U.S. House of Representatives

approved House Resolution 487, which identified M&S as a National Critical Technology. This resolution was a result of the work of the M&S Congressional Caucus, which was headed by Hampton Roads area congressman J. Randy Forbes. The resolution establishes that M&S is important to the national security; there is little doubt that a variety of powerful private and public organizations located in the Hampton Roads area are interested in the M&S field, not the least because it is seen as important to future progress. An interesting item to note, that in the U.S. alone, business firms, state and local governments, universities, medical schools and nonprofit organizations may spend as much as \$25 billion annually on M&S activities.
