MODSIM WORLD 2023

NTSA

MAKE IT HAPPEN 2023

CALL FOR ABSTRACTS

We are pleased to announce the Call for Abstracts for MODSIM World 2023, to be held 22 – 23 May 2023 at the Hilton Norfolk the Main, Norfolk, VA.

MODSIM will bring together M&S leaders focused on novel solutions and applications designed to innovate our future world. This unique, multi-disciplinary, and international conference and exposition features three presentation tracks, focusing on M&S communities of practice: Industry, Defense, and Training & Education. These main tracks include technologies, approaches, and solutions in numerous areas including Engineering, Medical Simulation, Data Analytics, Artificial Intelligence, Machine Learning, Extended Reality, Gamification, and Visualizations.

Our nation's military, first responders, government, and world leaders must be prepared to proactively respond to ever-changing shifts in threats, opportunities, politics, and policies. This pace of change requires that we predict and prepare for a variety of future opportunities in order to thrive under any circumstance. Michael Jordan once said, "Some people want it to happen, some people wish it would happen, others make it happen." The MODSIM World 2023 theme, "Make it Happen" is focused on the members of the M&S community and those innovative technologies they are creating.

MODSIM World features a robust agenda of papers and panels, industry workshops, and competition events, as well as an exhibit floor featuring a variety of companies and organizations showcasing new advances in M&S. Submit your abstract to one of the following conference tracks for a great opportunity to circulate your research throughout the M&S community:

INDUSTRY

DEFENSE

TRAINING & EDUCATION

INDUSTRY

The advancement of M&S within industry applications improves processes, outcomes, facilities, and equipment for the future of manufacturing, engineering, and infrastructure development. This track seeks papers focused on innovative M&S approaches and solutions which are rapidly moving the industry forward.

DEFENSE

M&S is critical to accelerate our national and international defense and security. To maintain a competitive edge, M&S facilitates rapid assessment and implementation of security protocols, practices, and procedures. This track seeks papers focused on expanding technologies and approaches in M&S to advance all levels of security.

TRAINING & EDUCATION

From health sciences and academics to social and environmental innovations, M&S is helping to transform all aspects of our current and future educational communities. This track seeks papers that discuss the application of pioneering concepts, methods, and technologies to enhance the application of M&S for the benefit of the greater community.

ABSTRACT SUBMISSION GUIDELINES

Abstracts of up to 250 words must be submitted by **10 November 2022**. Include:

- Concise and descriptive title and each author's affiliation(s)
- Short statement of the main point(s)
- Methodology (for experimental and survey work)
- Scope of the work
- Submission track

To submit an abstract, please follow the submission instructions available at
