

Tunnel Traffic

Biography

Mr. Jeremy Alessi

Jeremy Alessi is a software entrepreneur with 20 years of experience creating core technology, apps, games, books, and events. He founded Midnight Status in 2006 and has since created many products including Video Chat for Unity, Tunnel Traffic for iOS and Android, Swap Fire for Nintendo Wii U, and PixelFest which is Hampton Roads' first dedicated gaming festival.

The Pitch

Tunnel Traffic is a patent pending real time traffic monitoring and reporting system that allows a single user to alert 20,000 other users of a traffic backup within just 10 seconds as opposed to the typical 15 minutes provided by existing traffic aggregation systems. Tunnel Traffic displays this information in an easy to digest format that makes roadway decisions simple.
